### **Close to \$200,000 spent on veterinary care since July 2022**

The above number represents the cost of caring for over 30 dogs with special needs.

Besides standard veterinary care our rescues will always have the need for specialty care including, orthopedics, internists, ophthalmologists, surgeons, neurologists, and physical therapists.

***This event is crucial to re-establishing our financial trajectory.***

Let us introduce Ember, one of our newest rescues that needed our voice, our time, and our doctors. Thanks to your donations we have been able to get Ember mobile again.

Ember was crossing the road with her litter of pups. She made sure her pups were safely across but she was hit by a vehicle while following them.

She suffered serious injuries that made her a traditional candidate for euthanasia. When one of our intra-state partners contacted us with this story, we sprang into action. As soon as we met her we saw the spark of unbroken spirit -so we advocated for surgery for her shattered pelvis and broken leg. We were hopeful she could be completely rehabilitated; but because we specialize in supporting differently-abled pets, we were confident that we could provide her a happy ending even if that included a wheelchair. In short, Ember - named for that spark - had her surgery and is now practicing her post-recovery activities, including tail wagging, barking, walking & even running!

Her estimated rehabilitation cost is **nearly \$14,000**, and as with all of our stories, we rely on donor support to cultivate these successful endings.

Because of these efforts that were tailored to her needs, Ember defied the odds. ***She is now happy, healthy and MOBILE!***

***Her final step will be to find a home suitable for her needs.***  
***Which we are certain will happen soon!***

*Ember after her accident- **severely injured.***

*Her puppies by her side.*

*She knew she was in good hands and safe!*

***Help was on the way!***

*Two months later*

*Ember is now walking on all fours!*
